SUPPORTING THE COMPLETE PRODUCT LIFE CYCLE OF YOUR EQUIPMENT

Centering on traditional methods of equipment selection focused on lowest price can yield poor results and minimal value, particularly during the more costly operational phases of the product life cycle. **By reducing costs at each phase of the product life cycle, Smith & Loveless Georgia Inc. delivers increased performance and value to its stakeholders.**

As a long-time solution provider of efficient wastewater treatment and pumping systems and equipment, we're known for supplying outstanding project support in the design and specification stages through our consultative services and computer-aided design and selection tools. Our extensive manufacturing and product testing facilities combined with experienced field erection services yield robust, long-lasting systems. Finally, the start-up and operations stages are supported by a local Service Center in Covington, providing a variety of value-added aftermarket, engineering and technical services ranging from installation and troubleshooting through equipment monitoring and educational programs.

- PRE-SHIPMENT EQUIPMENT TESTING
- SYSTEM DESIGN & EQUIPMENT SELECTION
- PUMP STATION INSPECTION & MAINTENANCE
- PUMP SERVICE & REPAIR
- GRIT REMOVAL SYSTEM DIAGNOSTICS
- CLARIFIER OPTIMIZATION & RETROFITS
- PARTS WAREHOUSE IN COVINGTON:**

S&L FIELD SERVICES

FS

EQUIPMENT START-UP

OPERATION & MAINTENANCE

Smith & Loveless Georgia Field Services leads **Equipment Start-up** and **Operation and Maintenance** services in the area. We can assist customers with complete equipment start-up services and training, and long-term support. We can also provide emergency service and maintenance contracts to optimize your system's performance for decades to come. Plans are tailored to fit your time schedule and budget. With this flexible approach, Smith & Loveless Georgia Field Services contracts with customers to create successful conclusions with compensation based on mutually agreed upon metrics over time.

Request a Visit from our Trailer-Mounted Pump Stations to Learn All About the EVERLAST™'s...

Highest Efficiency

The S&L Non-Clog Pump with custom-trimmed impellers and premium efficient motors deliver the highest wire-to-wire efficiencies.

Safest O&M

All mechanical equipment is instantly accessible without confined space entry, eliminating extra gear and personnel for O&M.

Most Reliable

S&L Non-Clog Pumps are always designed for 3" (76 mm) solids handling per the 10 States Standard. Additional Non-Clog Impeller and Check Valve options.

Peace of Mind

EVERLAST™ pump stations are backed by an industry-leading warranty and total aftermarket support and technical service for life.
